

Multi Lingual Translation

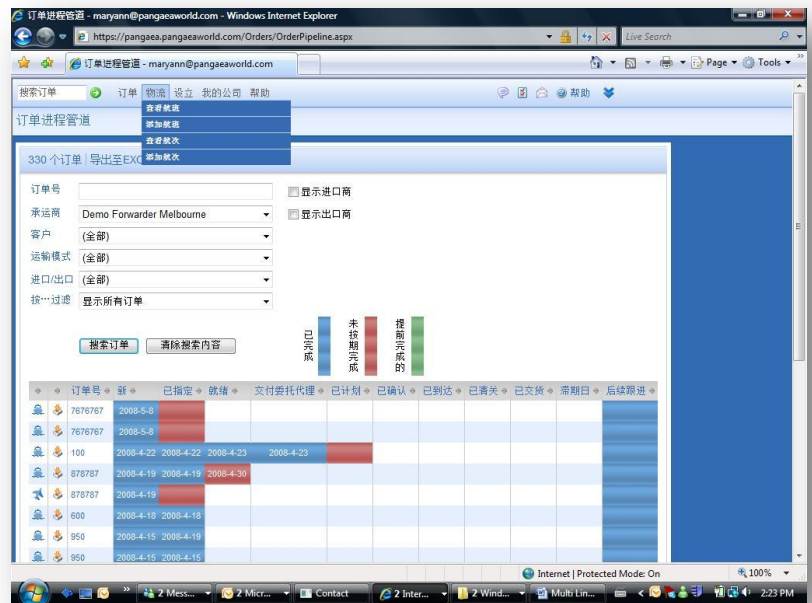

// PANGAEA FEATURE PROFILE SHEET Multi Lingual Translation

Communicating with your partners has never been easier!

Pangaea can be used, viewed and can generate emails in 13 different languages including:

- English
- French
- German
- Chinese Simplified
- Chinese Traditional
- Italian
- Korean
- Spanish
- Portuguese
- Japanese
- Dutch
- Russian
- Indonesian
- Greek

Furthermore, Pangaea offers accurate translation capabilities. For example, you can set Pangaea in English for your own use and in Chinese for your Agent. Both you and your Chinese partner will be seeing the exact same, real-time information.....just in a different language.

It really is amazing plus it is simple. From a drop down box in the user profile, simply select the language of the user and hit 'SAVE'. That's it!

What's more, once a specific language is selected, Pangaea automatically applies the date format for that language. Completely eliminating date format confusion. That really is smart.
